RECOMMENDATION LETTER

Dear Sirs,

I have the pleasure to inform you that Mr. Emre Beray Boztepe, as an ERASMUS+ student, participated in the Machine Learning Fundamentals course that I taught at Lublin University of Technology in the summer semester of the 2020/2021 academic year. At that time, he distinguished himself for his diligence and reliability in knowledge acquisition and communication skills, and he passed the course with the highest grade, i.e. A. In addition, Mr. Emre Beray Boztepe completed 2 individual projects involving image classification using deep convolutional neural networks. During this work, he demonstrated a high level of commitment and the ability to solve new problems independently.

On this basis, I highly appreciate Mr. Emre Beray Boztepe's competence in data processing and analysis, solving regression and classification tasks, implementing unsupervised and supervised learning algorithms, and practical application of deep learning methods to solve a variety of problems.

I am convinced that Mr. Emre Beray Boztepe fully deserves to be recommended. I think he will excel in positions requiring knowledge and skills related to machine learning in its broadest sense and will be a valuable employee.

Yours sincerely

Zbigniew Omiotek
